

TOGAF Business Architecture

The TOGAF Standard is the most prominent and reliable Enterprise Architecture standard, ensuring consistent standards, methods, and communication among Enterprise Architecture professionals. Those professionals who are fluent in the TOGAF approach enjoy greater industry credibility, job effectiveness, and career opportunities.

The TOGAF approach helps practitioners avoid being locked into proprietary methods, utilise resources more efficiently and effectively, and realise a greater ROI.

TOGAF Standard, 10th Edition is divided into the TOGAF Fundamental Content and the TOGAF Series Guides; the TOGAF Fundamental Content provides the core concepts and practices, and the TOGAF Series Guides advise on the configuration of the Fundamental Content.

Our TOGAF Business Architecture training is a three-day certification course that is accredited by The Open Group. It is based on a body of knowledge drawn from the TOGAF Standard, 10th Edition, and is aimed at individuals, such as those responsible for business planning, who wish to apply the TOGAF Business Architecture approach, and who need to gain competencies in TOGAF Business Architecture techniques.
