

Ferrari racing drivers give Alfa Romeo Giulia Quadrifoglio a go

Fresh from the Italian Grand Prix, Ferrari Racing team drivers Sebastian Vettel, Kimi Räikkönen, and Antonio Giovinazzi swapped their F1 race car to give the Alfa Romeo Giulia Quadrifoglio a go.

A short film shows the three Ferrari drivers behind the wheel of the Giulia Quadrifoglio – with its 2.9-litre Bi-Turbo V6 engine and which can achieve a top speed of 191mph and zero to 62mph sprint in 3.9 seconds – racing around Alfa Romeo's Balocco (Vercelli) test track just days after the Grand Prix in Monza.

Watch the short film [here](#).
