

The Student Expo, Africa's largest gathering of students and parents

Issued by [Student Expo](#)

10 Mar 2014

Following an exhilarating 2013, the Student Expo is the only exhibition aimed at students, school-leavers as well as graduates and even parents. It offers potential students and decision makers a 360 degree view of student life, covering the most important aspects of student life by bringing together key organisations within the tertiary, financial, transportation, accommodation, skills development and training arena. These expo's will take place between February and August in most city's including Cape Town at the Tygervally Shopping Centre and Blue Route Mall, Johannesburg at Nicolway Bryanston, Pretoria at the Brooklyn Mall and East London at Vincent Park.

The Student Expo was originally designed to solve problems and essentially help to make student's life experience one to remember with minimal issues. Scholars preparing to begin their journey into tertiary education will have the opportunity to gain a better understanding of what student life entails and gain insight into social and sporting clubs. They will be able to secure student loans, transport and accommodation. There will be opportunities for school leavers to gain a profound understanding of what exactly university life entails. They are able to explore options presented by a range of universities and learn how to secure loans, transportation options and manage their finances whilst living out of home. This all helps to reduce stress levels.

Students have the opportunity to view presentations by tertiary institutions and meet a wide range of universities, in order to gain insight to help them understand programmes. This essentially helps them in making the correct decisions and understand what would be expected of them in each profession through discussions, presentations and information from specialists. There will also be developers advertising their accommodation options. Banks will present various student friendly account options and student loans options.

Existing students will be provided with advice for future careers and help with finding work overseas. Student friendly deals in transportation will also be presented, including car hire and shuttle services. Information about student cards will be given, this helps the parents to understand how their money is being spent. Hobbies and clubs will also present themselves to help students become involved in extra murals and sporting teams. Graduates can explore career opportunities both locally and internationally as well as get advice on putting together a professional CV and learning interview skills.

Parents are able to get exposure and advice from different Universities as well as Colleges enabling them to assist their children in making huge life decisions. Not only is this expo for the students but also for parents as working people gain advice to further in their degree by doing more courses.
