

Expo for the energy industry

The third Sub-Saharan Oil, Gas and Petrochemical conference and exhibition is scheduled to take place 17 – 19 March 2008 at the Cape Town International Convention Centre. This year's theme, “Managing change in the African oil and gas industry”, is opportune as Africa's oil industry is starting to boom and high oil prices look set to continue. Sonangol, Russian and Chinese oil and gas producers and suppliers will be exhibiting for the first time.
