

Vellas creates launch film for new *Ghost Recon* franchise campaign

Vellas created the new launch film for the latest instalment of the *Ghost Recon* franchise. Vellas recently signed to Prettybird UK and US rosters.

There are two versions of the new Vellas-directed *Ghost Recon* film, one close to 5 minutes long and a 2:35 version. Seen from the point of view of Ghost, an elite US special operations soldier stuck behind enemy lines, the film fires on all cylinders creatively and visually.

The shoot took place in Ukraine and Kiev over a period of four days.
