Near Me is an innovative endpoint that offers highly location-targeted functionality for users with purchase intent. The native microapp enables users to discover nearby locations, promotions, weather, traffic & reviews as they scroll through top mobile publisher sites.

The user clicks on a category icon to display a dropdown list of locations. After clicking on a location, they are redirected to an engagement page, which prompts them to navigate to the store or share on WhatsApp - all with maximum efficiency.

Near Me's audience has rapidly scaled to 5 million users in just six months!
