

## Online courier-finding service launches in SA

CourierScout.co.za, an e-commerce application that finds couriers that match a user's requirements, was launched earlier this month. The service assesses the selected route and package information and returns with a list of price options. A CourierScout user can then compare available offerings from Aramex, Fastway and CourierIT and select a suitable provider. Once chosen, the system generates an offer and the user enters their credit card details and pays. For more info, go to [www.courierscout.co.za](http://www.courierscout.co.za).
