

## UberEats introduces KFC to the UberEats app

UberEats and KFC have announced a Finger Lickin' Good partnership, that sees KFC meals delivered right to customers homes or work, for the first time, through the UberEats app. KFC will be making their Streetwise 2 to Twisters available on the UberEats app as well as their famous buckets and other signature meals from 7 June 2017.

To celebrate the partnership, first-time-customer-users can order from the app using the promo code KFCEATS, which gives them a 50% discount (a value of up to R50 per order) each of their first two orders.
