

# Free online course to better understand WannaCry

Alison has launched a free certificate online course that teaches how to avoid the WannaCry virus and explains the concepts behind these attacks.

As of 15 May 2017, roughly \$50,000 worth of Bitcoin has been paid to unknown ransoms. It is believed by industry experts that these types of computer virus attacks are going to become more frequent.

## Global WannaCry ransomware infection map

18 May 2017

The online course outlines how to avoid the virus and steps that can be taken if a computer has been infected. It is aimed at those who would like to gain a better understanding of the latest WannaCry ransomware attack and to those wishing to protect against it.
