

Riverbed and Verizon partner up for AWS Direct Connect Bundle solution

Riverbed Technology has partnered with Verizon Enterprise Solutions to deliver an Amazon Web Services (AWS) Direct Connect Bundle solution to support hybrid architecture deployments. The solution will allow enterprise customers to connect their branch offices and data centres to AWS environments through managed, secure and optimised network services.

The product was announced at AWS re:Invent 2016 in Las Vegas and its technology combines Riverbed's industry-leading SteelHead WAN optimisation solution, Verizon's secure Cloud interconnect and virtual network services solutions and AWS Direct Connect solution. More information on the Direct Connect Bundle solution is available at

<https://aws.amazon.com/directconnect/directconnectbundles/>.
