

# **Saicom Voice Services, Thinkst Canary join forces with honeypot network security service**

Saicom Voice Services and Thinkst Canary have entered a strategic partnership which will see the companies combine their expertise and offer a fully-managed honeypot network security service. This honeypot network security service will improve the detection and mitigation of cyber-security breaches.

This service is to offer businesses a network security solution that will combine the security services given the increasing complexity of securing the trusted and untrusted network.
