

Short feature being shot exclusively in KZN

Oil on Water, Tidal Wave Productions' first short feature film, is being shot and produced exclusively out of KwaZulu-Natal during July 2006. "While South Africa is a country rich in locations, we found the raw and natural beauty that is an intrinsic part of Oil on Water, in KwaZulu-Natal," says director Peter Matthews. The production company has supported the development of the film industry in the province for the past six years, and has also drawn the majority of its crew and cast members from the region.
