

# Driving continued growth: The Ethiopia Summit 2015

Over the past decade, Ethiopia has experienced solid economic growth-GDP growth has averaged 10% a year and foreign direct investment reached almost US\$1bn in 2013/2014-but what more needs to be done for the country to achieve its full potential?

Is Ethiopia on course to achieve its ambitious goals with its second Growth and Transformation Plan?

- What are Ethiopia's future growth prospects?
- Is the state-led development model sustainable?
- What are the challenges currently faced by the private sector?
- What opportunities exist for private equity firms looking to enter the Ethiopian market?
- Will Ethiopia fully join COMESA's Free Trade Area to achieve further growth through collaboration?

Organised under the theme "Driving continued growth" The Economist Events' Ethiopia Summit ([www.ethiopi summit.economist.com](http://www.ethiopi summit.economist.com)) will bring together more than 150 of the country's leading policymakers and business leaders with international executives active or interested in expanding in Ethiopia to explore opportunities and tackle challenges.

Along with His Excellency Prime Minister Desalegn, the summit will feature speakers and panellists from government and industry including:

- HE Dr Arkebe Oqubay, Minister and Special Advisor to the Prime Minister, Federal Democratic Republic of Ethiopia
- HE Dr Abraham Tekeste Meskel, State Minister, Ministry of Finance and Economic Development, Federal Democratic Republic of Ethiopia
